

Littelfuse Inc
800 E Northwest Highway
Des Plaines IL 60016

July 5, 2004

To: Valued Customers

From: Farnjeng Lee, Product Manager

Subject: 3425L Series Product Obsolescence.

Littelfuse is announcing the obsolescence of the 3425L PTC Series. The 3425L Series has been replaced with the 1812L and 1206L series PTCs. The 1812L and 1206L series have similar electrical characteristics as the 3425L Series and have a smaller footprint for more spacing savings. A comparison table between the 3425 and the smaller replacements is attached.

We are offering a last time buy period for the 3425L series. We ask that all orders be placed by Oct. 15th, 2004 for shipment by the end of December 2004.

Please contact your local Littelfuse Sales Representative if you have any questions on this matter.

Regards,

Farnjeng Lee
